

FINGERSHIELD™

According to RoSPA, over 40,000 finger-trapping incidents occur in the UK each year, resulting in millions of pounds in compensation claims.

With Fingershield you can completely eliminate the risk of children and vulnerable people trapping their fingers in the hinge side gap of a door.

- You can rest assured that when Fingershield is installed, finger-trapping injuries will be prevented. Furthermore, you will be safeguarding your establishment from serious compensation claims, that range on average from £3,250 to £7,000.
- Over 1.5 million Fingershield devices have been supplied to organisations all over the world, including schools, nurseries and leisure centres.
- Available in a range of colours, Fingershield is functional yet discreet and designed to match or contrast with the colour of your doors.
- A Rearshield device is also available to complement the Fingershield, which is fitted on the rear side of the door. When both devices are used in conjunction, finger-trapping accidents are completely eliminated.

APPLICATION

- Fingershield devices are suitable for a variety of doors, with non-standard sizes available including a wide-fitting 4 panel Fingershield.
- Extensively tested to over 1.8 million opening and closing door cycles, to guarantee long-term durability.
- Installed in schools, nurseries, leisure centres, retail environments and restaurants.
