

SAFETY ACCESSORIES

The Cardea range of safety accessories has been designed with optimum safety in mind. From anti-ligature hooks through to plug socket covers, our innovative and cost effective solutions prevent accidents and keep children and vulnerable adults in your care safe.

SOCKET SHIELD

The Socket Shield is an innovative plug socket cover which effectively encloses electrical sockets to prevent plugs being removed or tampered with, eliminating the chance of electrical accidents.

- The unique design allows plugs to remain connected to the mains supply whilst preventing accidents.
- With a key operated design, the plug socket cannot be opened without the keyholder's knowledge.
- Easy to install with no requirement for re-wiring.

ANTI-LIGATURE HOOKS

- Cardea's Anti-Ligature Hooks help prevent injury or even death by replacing rigid hooks with an automatic, weight activated release system hook.
- Strong, vandal resistant and tamper-proof, they are easy to fit in any public cloakroom or bathroom where safety is of vital importance such as in a hospital or mental health facility.

APPLICATION

- The Cardea Solutions range of safety accessories are ideal for nurseries, schools and commercial environments where children or vulnerable adults could be at risk.

SPECIFICATION

- All of our safety accessories come with a free 12 month manufacturer guarantee.
